Impact Worldwide

The sub-links to this article divide the world into six major regions. Listed in each region you may see specific countries named. These reports are testimonies from among Simply The Story workshop attendees … lay people, pastors, ministry leaders and heads of denominations.

We want you to have access to peoples' initial responses to learning from Scripture and sharing with others.

Lastly, we feel it is important for us all to see what kind of long range impact STS has on effective evangelism.

Currently, we have far more reports to post than hands to enter the information! For now just take a look...

<td>&quot;A small group leader stated, 'We just gained a lot discussing the story using the STS skills, but we are very familiar with Scripture. You say people new to the Bible can do this, but we don't see that.' They were stunned when a man learning with them said 'I've never heard this story before.' They responded, 'But you were ... of the treasure!' (No one knew that this man was a Mx_l_m Background Believer (MBBX), a believer for only one year!)&quot;</td>

<td>&quot;We discovered that 20% of the people were functionally illiterate. I shared the orality statistics and explained how people learn best through oral means. A young pastor, who I later found was a successful businessman, approached me afterwards. I believe he was seeking help because he needed to learn to read, write, and talk to others. His message was that he was happy to read the Bible but didn't understand it until he learned to speak. Now he speaks three languages and is able to read and write in one of them.&quot;</td>
