**Simply The Story (STS) Workshop Locations**

***We are now offering an Online STS Workshop***

*See below for upcoming trainings*

***

Below we list STS workshops now scheduled in various locations worldwide. Many workshops are in remote areas or the registrations are instantly full, so not all workshops are listed in this list. For information on scheduling a world workshop, do write to one of these contacts or STS Headquarters.

After workshops, attendees show a thirst for learning more stories and deeper training, which has led to the establishment of Oral Bible Schools. In these OBSs, students gather periodically to learn over 296 stories.

**Schedule Options**

**One-Stop Workshop Schedule**

This schedule covers the 37 hours needed to teach people how to be an STS Practitioner and starts them on the skill of teaching. It is ideal in new areas where there are not yet local STS instructors or when people travel long distances to learn STS. For these workshops, out-of-area instructors, sometimes even out-of-country instructors, come together to lead the workshops.
Then, in the remaining 19 hours, a Practitioner Training is done for people who are new to STS. They arrive at the mid ... by assisting in training the new arrivals. This very full 37-hour schedule has been called “drinking out of a bucket.”

Local Workshops: Our goal and prayer is to have enough local instructors available all over the world so they can help reach ... and to then go home and practice their skills some before they come back the next time to receive more information.

For Local Workshops, most attendees will not have to travel far or stay overnight so there is little or no cost to anyone ... STS Story Practice gatherings. A few of those cities are listed below within the Upcoming World Workshop information.

Contact the regional leadership or USA office for information on hosting a vision casting or local workshop in a listed city. Check the guidelines for hosting a full One-Stop Practitioner/Trainer 37-hour workshop in a region where no local instructors are yet available.

Vision Casting: Also in these “staffed” locations, STS vision castings can be done. Vision casting provides opportunities for individual, small group, and larger team settings to hear the STS Story, engage in hands-on learning of digging into a story as well as a glimpse into the how-to of STS.

Alumni Advanced Workshop: Those who attend an STS workshop decide later that they want more coaching. We love to spend more time with those who are passionate about STS and have had workshop training, want to move toward becoming a certified instructor ... may be set up to be one to five days long and can be run as a stand alone or alongside a standard One Stop Workshop.

Instructor Advanced Training: If you have had workshop training, want to move toward becoming a certified instructor ... and become an instructor, lead these training. We reserve the right to gauge attendee readiness for this training.

Comprehensive STS Leadership Training: These occasional in-depth trainings cover a wide range of skills to help attendees prepare to lead STS in churches, ministries, workshops, Oral Bible Schools and bush plantings. These trainings are limited, and attendees are selected from interviews and recommendations by lead instructors.
